NEW ROAD TO SANDBURG PETROLEUM LEASE ACRE
Company Hopes to Prove Large Field on Sykes Land

Entrance of the Sandburg Petroleum Company into the Torrance field became known when it leased an acre owned by Mrs. Phoebe Sykes. According to the lease agreement, drilling will be started within thirty days.

A producing well on the Sandburg lease would be an important thing. It would prove up more than a mile of territory between it and the producing wells lying to the northwest on Carson street. There are a number of leases in the neighborhood of the Sykes property, and drilling is expected to start on all sides, especially to the east on the big Chanslor-Canfield Midway lease.

This area has not yet been drilled, though the field appears to have a southeasterly trend and is improving rapidly in that direction. Other leases that will be effected by the Sandburg well will be those held by the Petroleum Midway Oil Company and Selby & Root. It seems that in this section the companies have been jockeying in order to get the "other fellow" to prove up the territory first.

While the Sandburg company is pioneering in the southeasterly part of the field, the Orange County Drilling Company is preparing to test the oil sands a mile to the north and farther to the east. The first well on the Orange County's lease is being put down by the Peterson Barker Syndicate and has already been spudded. Further work on this well has been held up for two weeks awaiting the arrival of rotary equipment which is expected to be delivered at the well today.

Another Producer
 Another producer was added to the field last week when the General Petroleum put its Van Lew No. 1 on the pump. This well is making about 250 barrels from the 3600-foot level. This well was originally put down 4610 feet in an attempt to reach deep production, but was unsuccessful. Van Lew No. 1 lies on the west side of the field in the low gravity section and is believed to be near the northern limits of the field.

Five more wells are expected to be brought in within the next three weeks. One of these wells, Torrance No. 4, on the Chanslor-Canfield Midway lease, is standing cemented at 2949 feet. This well is 300 feet east of Torrance No. 3, which is making 600 barrels a day, with the gravity of the oil ranging between 27 and 28. It is the biggest well in the field up to date, having a slight edge on its offset, Torrance Community No. 2, on the Standard lease. A steady improvement has been shown as the wells go east, and Torrance No. 4 is expected to have a settled production of 1000 barrels or more.

Expect Two More
 The Chanslor-Canfield Midway Oil Company has two other wells which are expected to be added to the production column soon. They are Torrance No. 1 and Dominguez No. 1. The former stands cemented at 3550 and the latter at 4011 feet.

Two other near-producers are Felkner No. 1, cemented at 3200 feet, and Kirke No. 1, cemented at 2935 feet. Both are Standard Oil wells and are on the west side of the field in proven territory.

Despite the fact that he offered the biggest bonus ever held out to property owners in the Torrance field, W. M. Keck failed to get a lease on a five-acre tract lying just east of production and a few hundred yards north of Carson street. His bonus check for \$12,500 on the five-acre parcel was returned to him by M. R. Osburn, president of the Dominguez Land Corporation, at the request of property owners in the block, who are seeking better terms.

George F. Getty is putting up a derrick for his first well on Carson street, east of production. His first well will be an offset to the Chanslor-Canfield Torrance No. 5.

Furnish your Kitchen.

Make your kitchen bright with our new labor-saving utensils. They will save you work and you be proud of your kitchen. Come in and see our big stock of enamelware, aluminum and other kitchen things that you need. At the low prices we put on our goods, you can afford a new outfit.

NOSE CLOGGED FROM A COLD OR CATARRH

Apply Cream in Nostrils To Open Up Air Passages.

Ah! What relief! Your clogged nostrils open right up, the air passages of your head are clear and you can breathe freely. No more hawking, snuffing, mucous discharge, headache, dryness—no struggling for breath at night, your cold or catarrh is gone.

Don't stay stuffed up! Get a small bottle of Ely's Cream Balm from your druggist now. Apply a little of this fragrant, antiseptic cream in your nostrils, let it penetrate through every air passage of the head; soothe and heal the swollen, inflamed mucous membrane, giving you instant relief. Ely's Cream Balm is just what every cold and catarrh sufferer has been seeking. It's just splendid.

L. A. Beauty Dies At Juarez Party

EL PASO, Texas, March 8.—As a sequence to an alleged drinking party in a Juarez cafe, cost the life of Marjorie Greene, beautiful 17-year-old daughter of a prominent El Paso and Los Angeles family.

Miss Greene died two hours after she was brought to a local hospital from the cafe.

A verdict of "cocaine poisoning" was rendered by a coroner's jury following an investigation of the death.

Hemstitching, Dresses and stamp goods, Lomita—Adv.

Market Expert Boosts Newspaper Advertising

"The only man who makes money without advertising in the newspapers is the fellow who coins it in the United States mint," says J. H. McLennon, an electrical marketing expert for many years, now staying at the Angelus Hotel, Los Angeles. He has been showing electrical dealers all over the country how to make money, and has lectured before many women's clubs upon the advantages of modern electrical work-saving devices.

Mother-Love Theme Finely Developed

A story of mother love, beautifully developed, is said to be "The Impossible Mrs. Bellew," a new Gloria Swanson Paramount picture which will be the feature at the Torrance theatre Sunday and Monday, March 11 and 12.

"The Impossible Mrs. Bellew" is the story of a wealthy young mother's love for her little son and her reactions when the child is torn from her by the decree of a divorce court after an evil light has been cast upon her really innocent part in a murder committed by her husband. Called "The Impossible Mrs. Bellew," shunned as a pariah wherever she goes, the pathos of her love for her son forms the motivating force to a "mother-love" story decidedly different from the usual—and thoroughly modern.

"The Impossible Mrs. Bellew" was adapted by Percy Heath from a story by David Lisle, Sam Wood directed. Included in the supporting cast are Robert Cain, Conrad Nagel, Richard Wayne, Helen Dunbar, June Elvidge, Herbert Standing and Clarence Burton, all members of the Paramount Stock Company.

ECONOMY BRINGS ABUSE

Governor Richardson is receiving a great deal of abuse, just now, chiefly from city papers. But the Governor is resting easy because he knows that the people who elected him want expenditures cut to the bone. Why not? Individuals are doing it and even corporations have felt the call to economize. It is quite hard, probably, on the bunch of hired lawyers that he let go recently, but the common people won't worry about that. The ranchers and country people generally want lower taxes and they will support any move to secure it.—Riverdale Free Press.
